FIRST AID COURSES + PRODUCTS

www.firstaid.ca

WHO WE ARE

First Aid is a dynamic and fluid field that is continually changing with advances in medicine and educational delivery models. The **Academy of Emergency Training (AET)** is an educational institute which is overseen by paramedics, physicians and other health care personnel to ensure the most up-to-date materials and latest medical techniques are being taught. AET thrives in meeting the needs of our communities in promoting safety, both in the home environment and the workplace. Through consultation with our in-house medical experts, the **Academy of Emergency Training** offers the most comprehensive emergency management programs available.

AET has been operating for more than fifteen years in Canada. Our Medical Advisory Board ensures that AET programs are based on the most current medical and educational information available. As a versatile company, these modifications are immediately implemented with the Board's guidance. Using both a solid business acumen combined with sound medical guidance, the Academy has grown to become one of the largest and most diverse private safety training providers in Western Canada.

WHY CHOOSE US?

The **Academy of Emergency Training** is a nationally recognized and professional training institute. Our programs have been reviewed and approved by the Heart and Stroke Foundation of Canada, Transport Canada, Workers' Compensation Board and Health Canada to name a few. The Academy offers programs in first aid, CPR, AED, Lifeguarding, Learn to Swim and is the only business in British Columbia certified to train paramedics.

Convenience

Classes can be scheduled at your location or through our delivery partner's facility at a time that works for you – daytime, evenings or weekends. We schedule an instructor suited to your particular group and you just turn up for the experience!

Cost-effective Training

Materials and instruction are provided at competitive rates, whether you need training for yourself or for a group. As the **Academy of Emergency Training** is a Canadian company, the dollars you invest in training go right back into our communities for employment and sponsor lifesaving education.

Consistency Nationwide

The Academy has standardized programs and modules that only our top quality, certified instructors can deliver. Whether you need training on the West Coast, the East Coast, or somewhere in between, you will receive the same quality training through our network of delivery partners throughout the country.

Courses developed by experts

The **Academy of Emergency Training** course materials are developed in collaboration with leading educational and medical authorities and reflect the most current medical information and training techniques available. Our in-house medical experts ensure that we continue to offer the most comprehensive emergency management programs.

Quality

Government regulatory agencies, medical practitioners, and educational specialists review and audit the programs offered by the Academy on a regular basis. The Academy prints our Instructor and Student Manuals in smaller quantities. This enables us to immediately reflect the very latest protocols and techniques in emergency management. Other national agencies have warehouses full of manuals and can be considerably slower in implementing new training information.

Flexibility

We have designed our programs to meet the needs of all types of learners, emergency responders and emergency situations. Our programs combine lecture, video, group discussion, and hands-on training in a positive, relaxed and low stress learning environment. We have the flexibility to tailor our delivery and scenarios to your unique work environment.

TRAINING OPTIONS

We appreciate that finding convenient and cost-effective training that fits into your schedule can be a challenge. Flexibility for training is a key benefit with our organization and we offer alternatives to meet your needs. Please look at our three options for training and see which one will work for you.

1. Online Training

The process is quite simple. You register for whichever course you require by contacting our office or by registering online.

Once registration is complete, you will be granted access to the course. You can start the course anytime you like and proceed at your own pace. Once you have successfully completed our interactive and engaging course, you will be able to print the completion certificate for your records.

That's it! You can go back and review different aspects of the course until your certificate expires.

Benefits of ONLINE training:

- Cost effective
- Convenient
- Works around YOUR schedule

3. Blended Training

Blended (or hybrid) training is a combination of both the Online and Classroom training approaches. You complete the Online training components which is often at least 50% of a

traditional class. Once this component is done, you print the online certificate and bring it to your classroom session. The second stage is practising new skills in the classroom.

The final step is having an instructor evaluate your skills, provide feedback and issue you a certificate when successfully completed.

Benefits of BLENDED training:

- Benefits of both online and classroom
- Reduction in classroom time
- Direct instructor evaluation

2. Classroom Training

You can register yourself, or your group, in an upcoming class. We can also offer training at your location if you have

enough space. We have a number of partner sites so there is always a training location nearby. We organize all the details for a great class; the instructor, equipment and materials.

On the selected date, you attend the class and receive a completion certificate from the instructor upon it's successful conclusion.

Benefits of CLASSROOM training:

- Hands-on practice
- Interact with Instructor
- Provided at your or our site

Look for these icons in the catalogue and our website to find out what training options you have for each of our courses.

POLICY STATEMENTS

Registration

You can register for any of our courses by either completing our Registration Form available through our office or website OR you can register 24/7 with our online registration system accessible via our website at www.firstaid.ca

Payment

Your registration is complete and spot reserved when your full payment has been received. We accept VISA, MC, Paypal, online or over the phone. In person, you can finalize payment also with cash, cheque or money order. Purchase Orders can also be arranged if a course is being covered by your employer.

Cancellation Policy

The Academy of Emergency Training reserves the right to cancel, reschedule or modify classes. If this occurs, you will be contacted and confirm that any changes meets your schedule. If not, we will provide a full refund or allow a transfer into another course. If a participant wishes to withdraw from a course or reschedule, please follow our procedures and policies on the registration form.

Physical Fitness

First aid training is physically demanding. It will require prolonged kneeling, working in stooped positions, rolling patients and other physically demanding procedures. Accommodations may be made in some circumstances and you should consult with us to confirm we can meet those needs. Regardless of accommodation being made during the class, participants will be required to demonstrate specific skills according to an accepted standard before certification is awarded. Students need to be aware of possible allergic reactions to latex gloves and powder used in some brands.

Disclaimer

While every attempt is made to ensure we provide you with the most accurate information in our publications and website, sometimes mistakes are made. If you think there is an error, please bring it to our attention so that we can update our materials with the correction.

CPR & AED COURSES

CPR Health Care Provider (HCP) ⌚ 6 hrs

Designed to teach the skills of CPR for patients of all ages and use of an automated external defibrillator. It is intended for participants whose career is the provision of health care to patients and workplace emergencies (RN, Paramedic, Physicians, life-guards, firefighters etc.).

AED & CPR ⌚ 6 hrs

This program is for those who have are likely to require and use resuscitation skills. This primary care program is focused on life-threatening conditions, such as choking and cardiac arrest. The focus is on preparing the candidate to provide these lifesaving skills for babies, children and adults.

Recommended for

Emergency response teams, safety officers, workers with access to an AED, police, fitness personnel, programs requiring medical oversight and general public.

Content

Scene Assessment, Primary Survey, Combines CPR and AED skills, Adult, Child and Infant basic life support.

Prerequisites

Minimum age: 12 years old

Schedule

Please contact us to book this course

CPR-A ⌚ 3 hrs

This course offers a quality-training program in CPR for those with no previous training.

Recommended for

Adult care aids, general public.

Content

Scene Assessment, Primary Survey, EMS, Adult CPR, Review of AED, Interventions for choking, Signs and Symptoms of a Heart Attack & Stroke, AED Orientation is also included.

Prerequisites

Minimum age: 12 years old

Schedule

Please contact us to book this course

CPR-B ⌚ 3 hrs

This course provides CPR training for adult and child patients. This program is suitable for a variety of people working with people over the age of one year. The course is designed for hands on practice in emergencies such as choking and cardiac arrest. Over 80% of cardiac arrest occurs in the home—are you prepared? AED orientation is also included.

Recommended for

Marine workers, adult or child caretakers and general public.

Content

CPR-A plus interventions for children.

Prerequisites

Minimum age: 12 years old

Schedule

Please contact us to book this course

Automated External Defibrillator (AED)

For every minute a patient is in cardiac arrest without an automated external defibrillator (AED), there is almost a 10% decrease in their chances for survival. This program combines CPR review and AED use into cardiac arrest management with the emergency operation of an AED.

Recommended for

Emergency response teams, safety officers, workers with access to an AED, programs requiring medical oversight and general public.

Content

Review of CPR, use of the AED, documentation.

Prerequisites

CPR within the last year recommended

Schedule

Please contact us to book this course

COMMUNITY COURSES

Emergency First Aid ⌚ 7 hrs

This course in emergency care provides general knowledge in first aid by combining CPR and other important emergency skills. Candidates are taught how to intervene in life-threatening emergencies including: unconsciousness, choking, CPR and deadly bleeding.

Recommended for

Emergency response teams, safety officers, workers with access to an AED, police, fitness personnel, coaches and general public

Content

Rescue Scene Assessment, EMS System, Primary Survey, Airway & Obstructions, Cardiovascular Emergencies, AED, Deadly Bleeding, Minor Wounds & Burns, Patient Movement and Transport

Prerequisites

Minimum age 12 years old

Schedule

This course is offered as a one-day weekend class or a two-evening weekday class.

Standard First Aid – Wilderness ⌚ 24 hrs

This course covers all the advanced skills in a Standard First Aid program but with a wilderness/outdoor application. It is designed as an introductory level for outdoor enthusiasts who go on weekend excursions, camping, hiking, canoeing or with an ATV.

Recommended For:

Camp leaders, guides and outdoor enthusiasts

Content

Basic Patient Assessment and Critical Interventions, including Patient Packaging. Secondary Survey and Further Assessment and Treatment of Injuries in an Outdoor Environment.

Prerequisites

Minimum age: 14 years old.

Schedule

Please contact us to book this course.

Basic Life Support Pro ⌚ 6 hrs

This course trains a rescuer in the basic skills often required by individuals who act as a community or business first responder, individually or as part of a team. It combines the course material from the CPR C-Pro and oxygen therapy courses. The proper uses of portable suction units, oral airways and bag-valve mask devices are also covered.

Recommended for

Lifeguards, residential care aides, nurses, occupational first aid attendants, community watch programs and school supervisors.

Content

Rescue Scene Assessment, EMS System, Primary Survey, Airway & Obstructions, Artificial Respiration, Cardiovascular Emergencies, Oxygen Therapy, AED Responder and Shock.

Prerequisites

Minimum age: 16 years old.

Schedule

Please contact us to book this course.

WORKPLACE COURSES

Occupational First Aid 1 ⌚ 7 hrs *Emergency First Aid Workplace*

This course in emergency care provides general knowledge in first aid by combining CPR and other important emergency skills. Candidates are taught how to intervene in life-threatening emergencies including; unconsciousness, choking, and deadly bleeding. This is a WorkSafe BC recognized course.

Recommended for

Emergency response teams, safety officers, police, fitness personnel, people requiring certification and general public.

Content

Emergency First Aid course plus: Patient rolls and positioning, and Workplace Documentation.

Prerequisites

Minimum age: 16 years old.

Occupational First Aid Level 2 ⌚ 35 hrs

The Occupational First Aid Level 2 course prepares a candidate to work as a first aid attendant. Basic life support skills are reviewed as well as wound care and other assessments to allow safe interventions until an ambulance arrives.

Recommended for

Emergency response teams, safety officers, police, fitness personnel, people requiring certification and general public.

Content

Basic first aid and critical interventions are taught with oxygen therapy and treatments to manage a patient until medical help arrives. Designed for First Aid Attendants.

Prerequisites

Minimum age: 16 years old.

Schedule

Please contact us to book this course.

Occupational First Aid Level 3 ⌚ 70 hrs *Advanced First Aid*

The Advanced First Aid program integrates the latest medical assessments, techniques and interventions for the first aid provider. Candidates are taught the use of a variety of safety devices and techniques for emergency situations and rescues. Candidates are taught these new skills using the latest educational strategies and multi-media tools.

Recommended for

Paramedics working in BC, First Aid Attendants for hazardous workplaces, Construction Safety Officers and people requiring certification in advanced treatment delivery.

Content

Emergency Medical Services, Rescue Scene Assessment, Primary Survey, Airway Management, Breathing Management, CPR, Bleed Management, Minor Wounds, Shock Management, Accident Report Management, Patient Packaging and Transport.

Prerequisites

Minimum age: 16 years old.

Schedule

Please contact us to book this course.

Standard First Aid Workplace ⌚ 14 hrs

This program provides comprehensive training in first aid for the workplace. Candidates learn the same priorities of emergency care used by health care professionals in the pre-hospital setting. Additional emergency care topics include; injuries due to heat & cold, bone & joint injuries, spinal injuries, specific medical conditions, minor wound care, and poisons.

Recommended for

Emergency personnel, safety officers, fitness professionals and general public.

Content

Basic Emergency First Aid, Medical Illness, Heat-related Emergency, Fracture Management, Head & Neck Injuries, Poisoning, Burns & Wounds, Maternity, Chest & Abdominal Injuries, Mass Casualty Incidents, Behavioral Emergencies, Blood Pressure.

Prerequisites

Minimum age: 16 years old (with restricted ticket), 19 years for unrestricted.

Schedule

Please contact us to book this course.

Emergency First Aid Residential Care ⌚ 8 hrs

This training course focuses on adult emergency care. It has been designed for residential care aids and caregivers. CPR and first aid are integrated into this course, allowing the first aid provider to function with one consistent set of priorities beginning with: airway, breathing and circulation.

Recommended for

Employees of residential care facilities.

Content

Emergency First Aid with the focus on adult and residential practice.

Prerequisites

Minimum age: 16 years old.

Schedule

Please contact us to book this course.

Transportation Endorsement ⌚ 7 hrs

Course candidates practice how to move and transport patients to medical aid. This course covers patient handling and lifting techniques, spine board, clamshell and basket stretcher immobilization, patient assessment and treatment during transport, aircraft transportation, transportation vehicles, and applicable first aid applications.

Recommended for

Loggers, fishermen, Rig workers and others working more than 20 minutes away from medical aid at a site with more than 15 people or a high risk environment.

Content

Review of Primary Survey, Artificial Respiration, Oxygen therapy, Pulse Assessment, Patient Packaging including Hard Collars, Spinal Immobilization, Lateral and Supine Packaging Patient Transport and more.

Prerequisites

Minimum age: 16 years old with valid OFA 1, OFA 2 or equivalent certificate.

Schedule

One day course.

WORKPLACE COURSES ... continued

Oxygen Therapy ⌚ 2 hrs

The Oxygen Therapy training class reviews the role oxygen plays in the body, oxygen safety and handling, the benefits of oxygen to the injured patient, airway management and various oxygen delivery devices. The course includes both classroom sessions and hands-on practice.

Recommended for

Health-Care Professionals, Emergency Personnel, Health and Safety Officers, Medical Officers, Fitness Trainers and Coaches.

Content

Anatomy & Physiology, Rescue Scene Assessment, Primary Survey, Airway Obstructions, Airway Management for conscious and unconscious patients, Oral Airways and Oxygen, Ventilation Techniques, Oxygen Safety and Risks.

Prerequisites

None.

Schedule

Please contact us to book this course.

WHMIS ⌚ 3 hrs

The Workplace Hazardous Materials Information System (WHMIS) is Canada's hazard communication standard. This program provides worker education of the key elements of the system and orientation to proper product labeling and Material Safety Data Sheets.

Recommended for

People working with materials classified by WHMIS, needs to be renewed every 3 years.

Content

Introduction to WHMIS, Labels, Hazard Symbols, Material Data Safety Sheets (MSDS), WHMIS Education, Expectations of the Supplier, Employer and Worker, Exemptions and Restricted Applications

Prerequisites

None.

Schedule

Please contact us to book this course.

Marine Basic First Aid ⌚ 16 hrs

This course in emergency care provides general knowledge of first aid in the marine environment. Candidates are taught how to intervene in life-threatening emergencies including; unconsciousness, choking, rescue breathing, CPR, and deadly bleeding.

Recommended for

Mariners pursuing a certificate or endorsement as a Master or Chief Mate and designated first aid attendant on a near coastal voyage, class 2 or sheltered waters voyage

Content

Anatomy and Physiology, Rescue Scene Assessment, Primary Survey, Conscious/Unconscious Choking, Artificial Respiration, Cardiovascular Emergencies, AED, Deadly Bleeding, Shock, Burns and Scalds, Minor Wound Care, Medical/Behavioral Emergencies, Rescue and Transport of Casualty, First Aid Kits, Enclosed Spaces and Infectious Diseases

Prerequisites

Minimum age: 16 years old.

Schedule

Please contact us to book this course.

Marine Advanced First Aid ⌚ 32 hrs

This course in emergency care provides general knowledge of first aid in the marine environment. Candidates are taught how to intervene in life-threatening emergencies including; unconsciousness, choking, rescue breathing, CPR, and deadly bleeding. Candidates also are introduced to pharmacology and other advanced topics/interventions for the marine industry.

Recommended for

Mariners pursuing a certificate or endorsement as a Master or Officers certificate, designated first aid attendant on a near coastal voyage and Class 1 or sheltered waters voyage.

Content

Marine Basic First Aid content plus: Packaging of Patients with Spinal Trauma, Pharmacology and Injections, Radio Medical Advice, Sterilization and Environmental Emergencies.

Prerequisites

Minimum age: 16 years old.

Schedule

Please contact us to book this course.

Marine Medical Care ⌚ 52 hrs

This course in emergency care provides general knowledge of first aid in the marine environment. Candidates are taught how to intervene in life-threatening emergencies including; unconsciousness, choking, rescue breathing, CPR, and deadly bleeding. Candidates also are introduced to pharmacology and other advanced topics/interventions for the marine industry.

Recommended for

The person designated to take charge of medical care on board a vessel carrying less than 100 crew members and is engaged on a voyage of a duration of more than three days that is an unlimited voyage or a near coastal voyage, Class 1.

Content

Review of marine advanced first aid plus: pain relief, pharmacology, dental care, wounds, healing and infection, suturing and clamping technique, aspects of nursing including catheters and patient bathing, control of ship environment and sterilization, acute abdominal conditions, gynecological emergency, maternity, treatment and prevention of infectious diseases, substance abuse and psychiatric disorders, death at sea and external assistance.

Prerequisites

Minimum age: 16 years old, valid MAFA certificate.

Schedule

Please contact us to book this course.

Bear Aware ⌚ 3.5 hrs

A must-have course for people that spend time in bear country. The course is designed to reduce conflicts between people and bears both in the wild and the community.

Recommended for

Hikers, campers, forestry, mining workers and general public.

Content

Bear Species and Behaviours, Avoiding and Managing Bear Encounters and Attraction Management .

Prerequisites

None.

Schedule

Please contact us to book this course.

H2S Alive ⌚ 7 hrs

This one-day program is intended for all workers in the petroleum industry who could be exposed to hydrogen sulphide (H2S). The primary focus is to provide generic H2S program content to help workers work safely in and around H2S environments.

Recommended for

Workers in the petroleum industry.

Content

Physical properties and hazards of H2S, how to protect oneself and basic rescue techniques, how to operate a SCBA and detector tube device and how to perform basic rescues.

Prerequisites

None.

Schedule

Please contact us to book this course.

WORKSAFE BC COURSES

Responsibilities of Joint Health & Safety Committees

This course builds a foundation for participants to identify and interpret joint health and safety committee members; functions and duties and to carry out their responsibilities to promote workplace health and safety.

Schedule

One-day course.

Date	Time	Class No.
Jan 25, Wed	08:30 - 16:30	WSA-1201
Feb 29, Wed	08:30 - 16:30	WSA-1202
April 4, Wed	08:30 - 16:30	WSA-1203
May 9, Wed	08:30 - 16:30	WSA-1204
June 13, Wed	08:30 - 16:30	WSA-1205

Supervisor Safety Management

The focus is to help supervisors exercise due diligence and to carry out their responsibilities for creating and maintaining a safe and healthy work environment with; safety investigations, risk assessments, safe practice implementation and effective crew talks.

Schedule

One-day course.

Date	Time	Class No.
Feb 1, Wed	08:30 - 16:30	WSB-1201
March 7, Wed	08:30 - 16:30	WSB-1202
April 11, Wed	08:30 - 16:30	WSB-1203
May 16, Wed	08:30 - 16:30	WSB-1204
June 20, Wed	08:30 - 16:30	WSB-1205

Hazard Recognition and Control

This course guides the identification of workplace hazards, develop safe work procedures and controlling hazards.

Schedule

One-day course.

Date	Time	Class No.
Feb 8, Wed	08:30 - 16:30	WSC-1201
March 14, Wed	08:30 - 16:30	WSC-1202
April 18, Wed	08:30 - 16:30	WSC-1203
May 23, Wed	08:30 - 16:30	WSC-1204
June 27, Wed	08:30 - 16:30	WSC-1205

Preventing and Investigating Musculoskeletal Injury

Provides employers and workers with the knowledge and tools to identify risks and controls of MSI and to conduct investigations into an MSI incident.

Schedule

One-day course.

Date	Time	Class No.
Feb 15, Wed	08:30 - 16:30	WSD-1201
March 21, Wed	08:30 - 16:30	WSD-1202
April 25, Wed	08:30 - 16:30	WSD-1203
May 30, Wed	08:30 - 16:30	WSD-1204

Preventing Workplace Violence

Regulatory requirements and conducting violence risk assessments are discussed. Employers and workers are also presented with tools to reduce workplace violence

Schedule

One-day course.

Date	Time	Class No.
Feb 22, Wed	08:30 - 16:30	WSE-1201
March 28, Wed	08:30 - 16:30	WSE-1202
May 2, Wed	08:30 - 16:30	WSE-1203
June 6, Wed	08:30 - 16:30	WSE-1204

Does your workplace or organization have an AED?

More people are becoming trained to do CPR, however, CPR alone will typically not save a person's life after sudden cardiac arrest. Early access to an Automated External Defibrillator (AED) could be the difference between life and death.

The Academy of Emergency Training can supply your workplace or organization with the latest in AED technology at affordable prices.

Contact us to discuss which model will best suit your needs! 604.922.2249

Considering a Career as an EMR or Paramedic?

Emergency Medical Responders and Paramedics are integral components of the Emergency Medical System. Our EMR and Paramedic courses integrate the latest medical assessments, techniques, interventions and equipment.

Prehospital providers make a difference every day.
Are you up for it?

PROFESSIONAL COURSES

Dental Emergency Program ⌚ 5 hrs

The Dental Emergency Program was developed due to the specific needs and requirements that exist within the dental setting. This program prepares the dental team to react to foreseeable emergencies while consolidating the dental staff into a single emergency team. This team masters a strategic approach for handling medical emergencies in the dental environment and discusses medications that should be present in the office.

Recommended for

Staff of dental offices including dentists, dentistry students and dental office staff.

Content

Patient Assessment, Critical Interventions, Respiratory and Cardiovascular Emergencies, Vital Signs, Medical Emergencies, Drug Kit and AED use.

Prerequisites

None

Schedule

This course is offered in your office to suit your schedule.

Advanced First Aid ⌚ 80 hrs

The Advanced First Aid program integrates the latest medical assessments, techniques and interventions for the first aid provider. Candidates are taught the use of a variety of safety devices and techniques for emergency situations and rescue. Candidates are taught these new skills using the latest educational strategies and multi-media tools.

Recommended for

Paramedics working in BC, First Aid Attendants for hazardous workplaces, Construction Safety Officers and people requiring certification.

Content

Chain of Survival, Emergency Medical Services, Rescue Scene Assessment, Primary Survey, Airway Management, Breathing Management, CPR, Bleed Management, Minor Wounds, Shock Management, Accident Report Management, Patient Packaging and Transport.

Prerequisites

Minimum age: 16 years old, 19+ for unrestricted ticket.

Schedule

Please contact us to book this course.

First Responder ⌚ 35 hrs

First Responder is a comprehensive course designed for community fire fighters and those individuals most likely to be the first rescuers on the scene of an emergency. The program reflects the latest techniques in first aid and CPR. First Responder provides professional rescuers in British Columbia with the information and skills they need to respond to medical emergencies with confidence. Once completed there is an option to further your first aid knowledge and training through the FR III- EMR Bridging course.

Recommended for

Firefighters, police, emergency services.

Content

Role of the First Responder, anatomy and physiology, rescue scene assessment, primary survey, conscious/unconscious choking, artificial respiration, cardiovascular emergencies, AED, deadly bleeding, shock, burns, minor wound care, medical/behavioral emergencies, patient packaging, first aid kits, enclosed spaces, infectious diseases, bone & joint injuries, chest, abdominal and pelvic injuries, poisons, environmental emergencies, maternity, multi-casualty incident.

Prerequisites

Minimum age: 14 years old.

Schedule

This course is offered over six days. Friday classes run from 18:30-22:00, Saturday and Sunday classes run from 08:30 to 16:30.

Date	Class No.
Feb 10, 11, 12 & 17, 18, 19	FR-1201
May 4, 5, 6 & 11, 12, 13	FR-1202
June 1, 2, 3 & 8, 9, 10	FR-1203

Emergency Medical Responder (EMR) ⌚ 100 hrs

The Emergency Medical Responder (EMR) Program provides candidates with the initial steps in pre-hospital care education. The program includes learning a systematic approach to patient assessment as well as pre-hospital treatment for various medical and traumatic injuries. The course also covers rescue scene assessment, basic anatomy, EMR level treatments & protocols, and written and verbal communication skills.

Recommended for

People pursuing a career as a Level 1 Paramedic, oil rig medics and mining medics fire fighters.

Content

Contents of CPR-HCP, Secondary Survey, chest trauma, head and spinal injuries, patient packaging and transport, use of lifting devices, multi-person lifts, multiple rescuers, MCI, bone and joint injuries, minor wound care, documentation, pharmacology, ambulance orientation & emergency driving, medication administration, activity-related soft tissue injuries, medical and behavioral emergencies, legislation.

Prerequisites

Minimum age: 14 years old.

Schedule

This course is offered over four weekends, each class runs from 08:00 - 17:30.

Date	Class No.
March 3-4, 10-11, 17-18, 24-25	EMR-1201

OFA 3 / FR – EMR Bridging Program ⌚ 35 hrs

A bridging program that provides the Occupational First Aid or First Responder provider the extra skills and tool set to work on an ambulance.

Recommended for

People pursuing a career as a Level 1 Paramedic, oil rig medics, mining medics fire fighters.

Content

A program designed to bridge the gap between Occupational First Aid 3 and EMR. Extra topics include: pharmacology and medication administration in preparation for EMALB licensing.

Prerequisites

Minimum age: 16 years old, OFA 3 Certificate or FR Certificate with Spinal Endorsement

Schedule

This course is offered over five weekdays (Monday to Friday) or two weekends.

Date	Time	Class No.
Jan 28/29 & Feb 4/5	08:00 - 17:30	EMRB-1201
Feb 20-24	08:30 - 16:30	EMRB-1202
March 26-30	08:30 - 16:30	EMRB-1203
April 14/15 & 21/22	08:00 - 17:30	EMRB-1204
April 16-20	08:30 - 16:30	EMRB-1205
May 28-June 1	08:30 - 16:30	EMRB-1206
June 11-15	08:30 - 16:30	EMRB-1207

Paramedic in Industry ⌚ 4 hrs

Paramedic in Industry has been designed for Paramedics working in the field who require a valid OFA Level 3 ticket or equivalent, without them having to take the full 2 week course. Paramedic in Industry offers review and practice of the skills of a Level 3 attendant so the paramedic safely and legally can work under WorkSafeBC regulations.

Recommended for

Paramedics looking to work as an AFA/OFA 3 level attendant.

Content

Minor Wounds, Sprains & Strains, Eye Injuries and Examination, Activity Related Soft Tissue Disorders, First Aid Record and Referral to Medical Aid.

Prerequisites

EMALB License in B.C.

Schedule

This is a 4 hour evening course.

Date	Time	Class No.
Jan 11, Wed	18:00 - 22:00	PII-1201
Feb 15, Wed	18:00 - 22:00	PII-1202
March 21, Wed	18:00 - 22:00	PII-1203
April 11, Wed	18:00 - 22:00	PII-1204
May 23, Wed	18:00 - 22:00	PII-1205

PROFESSIONAL COURSES ... continued

Primary Care Paramedic (PCP) 1 week on, 1 week off format

The PCP Program is the second level of paramedic training. The program provides the skill set and knowledge required to practice as a Primary Care Paramedic. The program focuses on the skills required to assess and manage patients in a pre-hospital care environment according to the National Occupational Competency Profiles (NOCP). It delivers a strong foundation in anatomy, physiology, pathophysiology and pharmacology to strengthen the decision-making and treatment options to care for critically injured or ill patients in the pre-hospital setting.

Recommended for

EMR or EMS professionals looking to work at the PCP level, general public looking for a career as a Paramedic.

Content

The Primary Care Paramedic course encompasses numerous modules which are all designed, so at the end of the program, the student is able to: demonstrate mastery of the PCP patient assessment model, of PCP paramedic skills, of PCP procedures and protocols, of PCP assessment, interventions, treatments and management of medical and trauma calls as well as demonstrate clinical decision-making and leadership skills necessary to manage medical and trauma calls.

Prerequisites

Minimum 17 years of age; OFA III or equivalent (EMR recommended); CPR Level C Pro or HCP or equivalent; Grade 12 diploma or equivalent; Satisfactory criminal record check; Current Immunizations .

Schedule

This course is offered in a one week on, one week off format. Classes run from 08:30 to 16:30, Monday to Friday.

Start Date	Class No.
January 9	PCP-1201
March 12	PCP-1202
May 28	PCP-1203
September 10	PCP-1204
October 29	PCP-1205

Please contact AET Paramedic Academy for registration information on this program or view the website: www.aetparamedic.ca

Advanced Cardiac Life Support (ACLS) 7 - 15 hrs

This Advanced Cardiac Life Support (ACLS) course is an intensive scenario-based program for health care providers. The course is intended to provide health care professionals with guidelines for the recognition and treatment of lethal arrhythmias and acute coronary syndromes aimed to reduce death and disability of patients who suffer cardiovascular emergencies. The ACLS program can be tailored to meet various professional environments where the management of these emergencies is required.

Recommended for

Health-Care Professionals where medication administration is within their scope of practice (i.e. Dentists).

Content

General Content includes: respiratory emergencies, cardiac arrest and pre-arrest emergencies. Medications within the scope of practice will also be covered. Please note: these topics can be tailored to the field required.

Prerequisites

CPR within one year.

Schedule

This is a one day course with precourse study.

Date	Time	Class No.
Feb 4, Sat	08:30 - 16:30	ACLS-1201
March 31, Sat	08:30 - 16:30	ACLS-1202
May 18, Fri	08:30 - 16:30	ACLS-1203
June 9, Sat	08:30 - 16:30	ACLS-1204

ACLS - RECERTIFICATION 4 - 7 hrs

Date	Time	Class No.
Feb 4, Sat	12:30 - 16:30	ACLSRE-1201
March 31, Sat	12:30 - 16:30	ACLSRE-1202
May 18, Fri	12:30 - 16:30	ACLSRE-1203
June 9, Sat	12:30 - 16:30	ACLSRE-1204

Dental ACLS 7.5 hrs

This Advanced Cardiac Life Support (ACLS) course is an intensive scenario-based program for dental practitioners. The course is intended to provide health care professionals with guidelines for the recognition and treatment of lethal arrhythmias and acute coronary syndromes aimed to reduce death and disability of patients who suffer cardiovascular emergencies

Recommended for Dental Practitioners.

Content

General Content includes: respiratory emergencies, cardiac arrest and pre-arrest emergencies. Medications within the scope of practice will also be covered. Please note: these topics can be tailored to the field required.

Prerequisites

CPR within one year.

Schedule

This is a one day course with precourse study.

Date	Time	Class No.
April 28, Sat	08:30 - 16:30	DACLS-1201

IV Therapy 15 hrs

Establishment of a reliable vascular access is a crucial step in patient care. If vascular access is accomplished within the first few minutes of resuscitation, infusion of medications and fluids is possible and a successful resuscitation is more likely. This classroom course is designed to present the knowledge and skills required to initiate intravenous therapy in the pre-hospital setting. The candidates cover human physiology, intravenous therapy equipment and procedures, primary paramedic protocols, and hands on practice in starting intravenous therapy.

Recommended for

Health-Care Professionals

Content

Training for use of IV's and medication administration. Candidate's have access to plastic IV arms for practicing.

Prerequisites

License that permits administration of IV therapy.

Instructor Certification 16 - 40 hrs

A program for those who wish to enter the exciting world of safety training. This program focuses on training candidates in the art of safety instruction. At the successful conclusion of this program, candidates will be able to teach safety courses to the public or their workplace such as CPR, Emergency First Aid, and Standard First Aid.

Content

Instructional Techniques, Presentation Techniques, Lesson Planning, Teaching Adults, Documentation, Skill Review and Presentations, Examination Administration, Evaluation and Feedback

Prerequisites

SFA (or higher) including CPR Level C equivalent.

Instructor Re-certification 4 - 8 hrs

Refresher course on the initial certification. A time to go over skills, tips and tricks picked up since the last certification.

Content

A review of the instructor certification course and updates for courses will also be practiced.

Prerequisites

Taught at least 2 courses per year since being certified.

Instructor Update 2 - 6 hrs

Every 5 years new guidelines for CPR and basic emergency first aid. EMALB, WorkSafeBC, Transport Canada and other regulatory bodies update their course content and requirements. This update will go over the changes, how to implement them and the rationale behind any new techniques or procedures.

Content

New guidelines and protocols

Prerequisites

Taught at least 2 courses per year since being certified.

PRODUCTS

Oxygen Carry Bag for D Cylinder

Ferno's high-quality, long-lasting kits are designed for today's tools and today's emergency professionals. Kits are constructed from DuPont Cordura for a long life, and YKK zippers are used on all Ferno kits. Available in blue/red/green/orange.

\$119.00

Disposable Bag Valve Masks

PVC bag for sure grip and comfort and a transparent re-breathing valve assembly allows for clear viewing of valve function. Available in adult, pediatric, and infant sizes.

\$19.00 each

Aluminum Oxygen Cylinders

Aluminum Oxygen Cylinders are up to 40% lighter than steel, absorb more impact energy, and have greater resistance to damage from rough handling or accidental dropping. Available in "C", "D", Jumbo "D", and "E" sizes

\$94.00 – 152.00

BRAVO2 Regulators

BRAVO2™ Oxygen regulator bodies are constructed from a solid piece of brass, creating a uni-body style regulator that provides added strength and safety. The quality crafted internal brass components will not burn under 10,000 psi, making for a safe and effective regulator. The regulator is nickelplated, providing an attractive corrosion-resistant finish.

\$139.00

Berman Airways

These airways are molded of semirigid, non-toxic, polyethylene. The two-channel design allow for safe insertion or withdrawal of a suction catheter and ensures an unobstructed pathway for ventilation. Compact kit includes six sizes: infant (43mm), child (60mm), small adult (80mm), medium adult (90mm), large adult (100mm), and extralarge adult (110mm).

\$9.00 per set

Nasopharyngeal Airways 9/kit

Robertazzi style airway with fixed flange. Made of neoprene and designed to minimize entry trauma and increase patient comfort. Indicated for use where patient has a blockage of normal anatomical airway. Packaged sterile. Kit includes nine sizes along with water-soluble sterile lubricant packs: 20fr., 22fr., 24fr., 26fr., 28fr., 30fr., 32fr., 34fr., and 36fr.

\$74.00

CPR Pocket Mask with O2 Port & Case

The FERNO™ CPR Mask is ready to use right out of its rugged storage case. The latex-free mask comes complete with filtered inlet valve, O2 inlet port and head strap. The FERNO™ CPR Mask is a reusable mask used for mouth to mask ventilation.

\$2.00

Wizloc Cervical Collar 3 pack

With its 3-step adjustment, application is fast regardless of patient position. The unique self-centering mandibular support allows you to custom fit the WizLoc to the patient. A simple adjustment to the occipital support also accommodates all ends of the sizing spectrum. The WizLoc gives you greater control, greater patient comfort, and a better fit, which means safer conditions for the patient.

\$39.00

FERNO Universal Head Immobilizer

Simple to use, lightweight and easy to clean. Composed of two plastic-coated, closed-cell foam head supports, a universal attachment base and two durable head straps. Base plate fits all Ferno wooden, aluminum and plastic backboards. Head supports can be used on standard backboards, or turned around for use on the Scoop Stretcher.

\$129.00

Wool-Blend Blanket

Ferno blankets are constructed from the finest quality materials to withstand years of hard use. The Model 354 Wool Blend Blanket is made of 70% wool and 30% synthetic fibers.

\$46.00

ScoopEXL Stretcher

Ferno's Scoop EXL Stretcher provides superior comfort and safety to patients who need spinal immobilization. The Scoop EXL eliminates the need for log-roll maneuvers, which significantly decreases movement to the cervical spine. The ScoopEXL is made from X-ray translucent, lightweight, high-impact composite materials. The two hinged, interlocking pieces allow operators to bring the two halves together beneath the patient and gently scoop them up.

\$879.00

Gazelle Stretcher, Regular

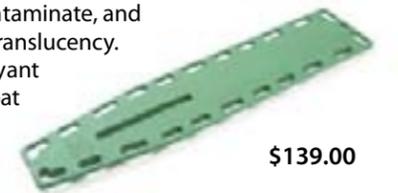

The Gazelle Series Basket Stretchers include three distinct versions in an all-carbon-steel, MIG welded frame construction. All three rely on its frame geometry, construction methods and materials for its ultimate strength.

\$289.00

201 Najo Lite, No Pins

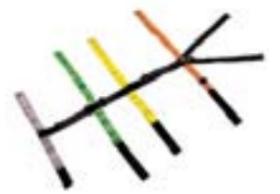

The NAJO Lite is our lightest NAJO backboard at just 14.5 lbs. and features a central slot in the lower half of the board to immobilize each leg separately. The Lite also features two handholds at the tapered end to allow more stable transport and angled edges for easy log-rolling. Strong, one-piece HDPE construction is impervious to all bodily fluids, is easy to decontaminate, and provides 100% x-ray translucency. This board is also buoyant and can be used to float a patient in the water. Standard colors are: red, orange, yellow, green, and blue.

\$139.00

Fastrap™ Quick Restraint System

The Ferno Fastrap™ Quick Restraint 10-point, six-strap system is used to quickly secure patients to backboards and other devices. It is designed for easy storage and rapid application in patient immobilization. The color-coded Fastrap is black, red, yellow, green and gray, sequentially coded.

\$95.00

Littmann Classic II S.E. Stethoscope

The Littmann Classic II is the stethoscope of choice for AET's paramedic students. Featuring a two-sided chest-piece, this classic stethoscope offers high acoustic sensitivity for superior performance. A tunable diaphragm on one side augments the traditional bell function of the opposite side.

\$112.00

FERNO2 MVP Suction Unit

The FERNO2 MVP Suction Unit is robust, lightweight, high vacuum portable suction unit. The reusable pistol style pump comes with disposable 300 ml disposable collection jar, 13 mm adult and 6 mm child disposable suction catheters. The collection jar rotates allowing the operator to achieve the optimal position for suctioning/aspiration application. The unit is designed with an overflow protection mechanism that resists clogging and prevents spilling.

\$55.00

SPO Medical PulseOx 5500™

It has never been easier to access the essential information to successfully manage your oxygen saturation level. With our sophisticated sopt-check oximeter you can go about your daily activities with piece of mind. The PulseOx 5500™ is the world's first spot check monitor for blood oxygen saturation and heart rate to use reflectance pulse oximetry (RPO). The PulseOx 5500™ uses SPO Medical's patented technology to provide a medical device which can be used as often as needed and is less expensive to operate than any other device available.

\$125.00

First Aid Kits

AET provides a variety of first aid kits to equip your facility. Level 1 kit with blankets

\$138.45

36" SAM Splint

The SAM (Structural Aluminum Malleable) Splint contains all the properties of the many other splints that it replaces. When folded into a "structural bend" longitudinally, the splint becomes quite rigid and easily supports the leg, forearm or humerus. X-ray translucent.

\$9.90

35X PROFlexX Ambulance Cot

Ferno's PROFlexX® cot provides superior stability and safety you need when transferring and transporting patients. A longer, fixed front leg in the X-Frame provides minimal flex and a low center of gravity at all heights. This means you may be less likely to flip or tip a cot during transfers and transport, reducing situations that may cause injury to you or your patient.

\$4,990.00
